

# Array Sector 2-14

## SECTOR ANTENNA WITH CARRIER CLASS PERFORMANCE

RF elements® Array Sector antennas are optimized for high performance in unlicensed frequency bands. They offer excellent RF performance, colocation capability, easy installation, and cost-efficiency.

The side lobes of Array Sector antennas are suppressed using BackShield™, our patented, frequency selective surface attenuating azimuth side lobes and back lobe, integrated into the antenna body.

The gain of Array Sector 2-14 is stable in both, horizontal and vertical polarizations, offering reliable performance regardless of which channel you use. The antenna is light and made of high-quality non-corrosive materials for long-lasting performance.
