

WATER LEAKAGE DETECTOR | BF1

Wireless water leakage detector with instant detection and remote alerting.

Wireless

Operating range 100m

Instant Leak detection

Fits in small spaces

TWO-WAY WIRELESS COMMUNICATION

Wireless water leakage detector with two-way communication for reliable alarm transmission.

INSTANT LEAK SENSING

Water leakage detector with sensitive electrodes for immediate detection of water presence.

REMOTE ALERT NOTIFICATIONS

Leak detection with instant remote notifications via the Teltonika Security Systems mobile app.

FLEXIBLE PLACEMENT

Compact wireless detector for installation in kitchens, bathrooms, basements, and other critical areas.

Main features

Product type	Alarm system detector
Compatible with control panels	P64, S32GM, S32GE, L32
Operating frequency	868 MHz
Communication range in building	Up to 100m
Communication with hopping code	Selectable
2-way technology	Yes
Built-in magnetic contact (reed switch)	-
Number of inputs for external detectors (magnetic contacts or roller-type detectors)	-
Event sending (open contact, triggered input, or detected motion)	Yes
Restore event sending (closed contact, input restored to normal state, motion no longer detected)	Yes
Tamper transmission	Yes
Battery low status transmission	Yes
Supervision transmission	Yes
Power supply	3V CR2
Battery life	~ 3 years
Overall dimensions W x H x L in mm	61 x 23 x 61
Operating humidity	0% - 70%
Environmental compliance	ROHS
Operating temperature	-10oC up to +50oC
